Silesia, Poland

EDUCATION

Władysław Szybiński High School, Cieszyn
Programmer
2019 - 2023

Silesian University of Technology, Gliwice
Computer Science engineer degree
2023 - present (2027)

ACHIEVEMENTS

- **INF 03 Certificate – Web & database development and administration**
- **INF 04 Certificate – Application Design and Programming**
- **Az-900 Certificate - in progress**
- **Udemy courses: Java, Python**

LANGUAGES

English

Polish

ABOUT ME

I'm a Computer Science student focused on cloud technologies and modern software solutions, with a growing interest in AI and its ecosystem of tools. I actively follow new trends and enjoy building tools and automations that simplify processes in both work and everyday life.

EXPERIENCE

October 2025 - currently

Cloud Support Engineer

SAP, Gliwice

Supporting SAP Commerce Cloud environments by troubleshooting production issues, analyzing logs, and ensuring system stability.

- Investigating incidents across Backoffice, Storefront, APIs and other.
- Analyzing logs (Kubernetes, Azure, Dynatrace)
- Troubleshooting deployments, performance, authentication, and Azure-related issues (Blob Storage, networking basics)
- Working with Kubernetes (logs, pods, scaling)
- Supporting CI/CD processes
- Communicating with customers and internal teams
- Developing and maintaining internal tools, including DevOps improvements and automation

Paramedic

December 2023 - September 2025

American Heart of Poland, Ustroń

Working in a large health resort (sanatorium) with patients of all ages helped me build strong communication and organization skills. I learned how to:

- Manage time and multiple tasks during busy shifts
- Communicate clearly, kindly, and with empathy
- Stay punctual, focused, and professional
- Adapt to different patient needs (both older and younger people)
- Handle health-related data accurately and securely

I hereby give consent for my personal data to be processed for the purposes of recruitment in accordance with Regulation (EU) 2016/679 of the European Parliament and of the Council (GDPR).

SKILLS

- **Programming Languages:** Python, Java, C++, SQL, HTML, CSS
- **Cloud:** Microsoft Azure, Kubernetes, CI/CD basics, automation
- **Monitoring & Troubleshooting:** Dynatrace, log analysis, incident investigation, root cause analysis
- **Tools and Technologies:** Android Studio, GitHub, XAMPP, VS Code, Visual Studio, PyCharm, CLion, IntelliJ IDEA
- **Soft Skills:** Quick adaptation to new technologies, communication, problem-solving, teamwork, time management
- **Growth Mindset:** Eager to learn new technologies and actively expand knowledge

INTERESTS & PASSIONS

- **AI techologies and tools**
- **Automotive culture & motorsport enthusiasm**
- **Creative photography & photo editing**
- **Computer hardware building & DIY device repair**
- **IT infrastructures(smart home)**
- **Software development & open-source projects**
- **Space exploration & astrophysics curiosity**

PROJECTS

SanitariuszApp

Kotlin Multiplatform, Compose Multiplatform, Firebase Firestore, Android, iOS

A cross-platform mobile application built for a health resort to support daily patient-care operations. The current version provides medical staff with a unified workspace for managing patient records, tracking treatment procedures, coordinating shift handovers, and synchronizing updates across devices. The system combines a clean mobile interface with local data storage and Firebase-backed cloud sync to keep operational data consistent and accessible on both Android and iOS.

- Role-Based Patient Management: Staff can manage their own patient list, preview patients assigned to other employees in read-only mode, and work within a role-aware workflow designed for day-to-day clinical operations.
- Cross-Device Synchronization: Patient and procedure updates are synchronized with Firebase, with local persistence and manual/background sync support to improve reliability across mobile devices.
- Administrative Oversight: Supports administrative control over staff data and patient allocation, enabling better coordination across teams.

YouTube Comments Analyzer

Python, Flask, JavaScript, jQuery, Google GenAI SDK, JSON

A web-based application that analyzes YouTube video comments to extract key insights and trends. It processes comments to identify top and most liked entries, detect common topics, and flag potential spam. Integrated with Google Gemini via the GenAI SDK, the app allows users to interact with AI to get insights about audience opinions, supported by real comment examples.

- Comment collection and processing from YouTube videos
- Topic detection and trending discussion analysis
- Identification of top and most liked comments
- Basic spam detection
- AI-powered insights and Q&A based on comment data (Gemini API integration)
- Interactive frontend using JavaScript and jQuery
